## CHANGES & CHALLENGES IN THE POWER OF EDUCATION

### — What Keeps You Awake at Night? —

We are in a changing context that presents challenges for educators, learners, parents and society alike. What kind of education do we require to create and build the world to which we aspire?

Mr Peter Kearns (OAM FACE) will chair, introducing our speaker and panelists to inspire, stimulate and draw from audience engagement on burning issues. Questions such as: “Are we assenting or dissenting in silence?”, “What bugs you about education today?”, “Are you ‘extractive’ or ‘inclusive’?”, “How are identity politics impacting?”, “How do we create and equip for educational and career excellence?”, “What more can education do?” will help resolve “What Keeps You Awake at Night?”, towards embedding an education and learning culture that “empowers individuals and nations”.

### Guest speaker

#### **Emeritus Professor Colin Power AM FACE**

A global leader in educational research, policy and practice, Power is the former Deputy Director-General, UNESCO. Prior to this international work, he held esteemed positions across secondary and tertiary education in Australia. Power’s presentation will explore ten key themes:

*the power of education*

*education for all*

*learning to know and do*

*the funding challenge*

*global warming*

*empowering nations and communities*

*learning through life*

*learning to be*

*innovation, science and technology*

*global citizenship (learning to live together)*

Power will explore the forces “linking people’s lives more deeply, more intensely, and more immediately”.

### Panellists

**Ms Kath Kayrooz**, Principal - Queensland Academy for Science, Mathematics and Technology

**Mr Robert Baldi**, Board and Parents & Friends Member – Clairvaux Mackillop College

**Professor Donna Pendergast**, Dean & Head of School of Education and Professional Studies – Griffith University
